

BC Finance Lead

Job Summary

The Microsoft Business Solutions (MBS) business unit at IntelliSense is seeking an experienced Business Central Finance Lead Consultant with knowledge of all phases of large-scale enterprise D365 Business Applications projects; with a hands-on approach and proven experience in end-to-end implementations, along with interfacing and integration of Dynamics products. Consultancy experience is a must as this role will entail continuous interaction with clients, managing onshore consultants whilst also working with both onshore and offshore development teams. This role will also require a level of pre-sales activities focused on D365 Business Applications and the wider Microsoft platform. You will also contribute to proposal development and provide input in business development whilst mentoring more junior staff.

This role is key to IntelliSense IT Microsoft Business Solutions' customer delivery for Microsoft Business central solutions. It is a dynamic and exciting opportunity to join a rapidly developing business area within an established and market-leading global firm.

Key Responsibilities

Project Responsibilities

- Leading the Finance, SCM and/or Retail workstreams of full end-to-end D365 implementations through all phases of the project lifecycle
- Lead the solution on a workstream level, make design decisions and create solution documentation
- Responsible for leading and managing a team comprising a group of talented consultants, each holding different levels of expertise
- Provide on-site support as required by the company or client
- Have very good understanding of Business Central functional capabilities
- Involvement in functional interfaces and integrations with D365 Business Applications
- Work with on-site engagement team and client team to gather requirements, determine expectations and finalise deliverables
- Gather and document functional requirements and complete gap/fit analysis
- Ensure quality project delivery and demonstrate experience in system and functional testing
- Demonstrate awareness of scope (creep) and use of change control
- Deliver end-user training to clients and colleagues
- Demonstrate ability around upselling and understanding of additional company capabilities
- Responding to RFPs and RFQs
- Demonstrate excellent foundational consulting skills, including analytical know-how, written & verbal communication, team participation & presentation skills

- Solve and advise on complex problems with creative solutions
- Meet and exceed customer expectations from business knowledge, skills and behaviour
- Ensure progress updates are communicated to relevant parties both formally and informally

Practice Responsibilities

- Awareness of product roadmap and the content of future releases of D365 Business Applications in the Finance, SCM, and/or Retail area, and demonstrate changes/additions to team members
- Identify practice development activities and strong involvement in the creation and delivery of these to fellow colleagues
- Involvement in further development of Finance and/or SCM and/or Retail capabilities in the D365 Business Applications product team
- Promote the values of our company
- Manage performance and mentor junior members of the team
- Willing to travel abroad when required
- Always represent IntelliSense IT in a professional and positive manner
- Ensure timely completion of internal processes and mandatory training
- Carry out additional duties as may occur from time to time, as instructed and agreed by Delivery Manager

Required Experience

- Minimum 5 years of relevant experience working with Microsoft Dynamics NAV and/or Microsoft Dynamics 365 Business Central
- Experience in leading a team of a minimum of 4 members
- Experience of ERP implementations
- Experience of thinking clearly and calmly under pressure with sound judgement and decision-making abilities
- Experience of constantly assessing and incorporating new technologies and software into their skill set
- Experience managing others and leading more junior consultants to a successful outcome
- Pre-sales experience
- Business process mapping, modelling, and documentation knowledge

Skills and Qualifications

- Degree in Business & IT or similar

- Excellent communication skills in English, both verbally and in writing
- Ability to lead meetings and workshops and confidently present to the C-Suite
- Outstanding understanding of accounting processes, principles, functionality & systems
- For Finance roles: Solid Finance background (ACA/ACCA/CIMA part qualified or qualified is desirable but not essential)
- Excellent knowledge of the following areas of an implementation project lifecycle:
 - Requirements analysis and documentation
 - Business process mapping and modelling
 - Development testing and UAT
 - Data migration
 - Cut-over activities
 - Go-live support
- Strong MS Office skills (primarily Word, Excel and PowerPoint; Visio is a plus)
- Strong understanding of data migration
- Knowledge of Power Platform capabilities and Business Intelligence (BI)
- LCS and Azure DevOps knowledge
- Understanding of integration tools and technologies
- Works independently as well as in a team environment
- Client-centric approach with emphasis on client satisfaction
- Knowledge of best practices for working with offshore teams and on multi-national projects
- Excellent presentation and demonstration skills
